

# BUILD A MOBILE APP USING SAP BTP - NO CODING SKILLS

## CITIZEN DEVELOPMENT

DalRae Solutions will present with SAP's Murali Shanmugham in this session, attendees will learn how easy it is to build their own mobile App – with no coding!

Using SAP's AppGyver tool (now also available for trial), participants to this session will be guided through the steps to create a powerful mobile App which will be able to scan a barcode and fetch product details in real-time. No coding skills are required, as we demonstrate the power of SAP's no code technology.

Targeted at business technologists, SAP professionals looking to learn about the latest tools, and IT teams who are keen to accelerate their app development, after this double session you'll be able to look forward to creating your very own App!

### WHAT IS A CITIZEN DEVELOPER?

This is the concept of users with little or no coding knowledge being able to build applications that integrate with your core systems. The SAP BTP platform allows these users to work together with professional developers to create tangible business benefits.

### WHAT IS NO-CODE / LOW-CODE?

What do we mean when we say No Code platforms, and what is SAP doing with them

### LEARN ABOUT APPGUYVER

How does AppGuyver fit into the SAP development landscape, what it is capable of and where to go to find out more

### BUILDING A NO-CODE APP TO IMPROVE YOUR BUSINESS

Follow along in session while we build a demo application using device native capabilities and API integration. This principle can be applied to solve multiple business problems quickly and at low cost.

### Improve Usability

BTP is purpose built to reduce complexity and improve business agility, for both business & operations.

### Innovation Platform

Built for innovation, BTP is the best way to future proof your business and build resilience in today's world.

### Transform Today

BTP is available now, with low cost to entry and fast time to value, it's ready to leverage today.
